

GLOBAL DATA CENTER SECURITY PRACTICE

Data Center Physical Security Design
& Installations Specialists

Global Data Center Security Practice

The demand for safe and reliable provision of data storage is increasing on a global scale. Security is a critical matter for any data center operator to ensure the integrity and functionality of data storage systems. By offering a dedicated experienced team who specialize only in Data Center projects, STANLEY Security plays a vital role in safeguarding your data center, ensuring maximum uptime for your existing facilities and on-time delivery of new projects.

STANLEY's Security Global Data Center Security Practice is designed to respond to the challenges that come with Data Center accounts in a superior and more efficient way. We have vast experience in managing the complete security needs of major data center clients who are active on a global scale. We work efficiently and effectively with a single point of contact through our centralized cross-border team.

STANLEY Security partners with the industry's leading product suppliers and manufacturers to implement a world-class integrated solution for your data center. Armed with innovative products and a global program management team, STANLEY Security offers a total solution that meets your complex security requirements, now and in the future.

STANLEY Security offers end-to-end data center security solutions including:

- ▼ Risk assessment, systems design and engineering
- ▼ Project management, security system installation, commissioning and maintenance
- ▼ Access control, perimeter protection, video surveillance and visitor management systems
- ▼ Account-specific requirements including compartmentalized security zones and biometric access control

STANLEY Security never forgets what matters most. Our primary focus is making your job easier as your security needs evolve. Our dedication to understanding your unique needs is readily apparent in everything we do, from ensuring on-time installation, to providing outstanding service, long after contracts are signed. When you partner with STANLEY Security, you will enjoy peace of mind that comes from having one superior source for all of your global security needs.

Technologies and Products

LENEL

Lenel is committed to developing innovative security technology and progressive solutions that deliver leading integrated access control. As the definitive open-architecture partner, Lenel provides flexible and reliable options to support your current and future security needs.

C•CURE

C•CURE 9000 delivers access control while empowering customers to utilize IT-standard tools and distributed architecture. The flexibility of this system grants security professionals the freedom to deploy a robust integrated system which can be easily combined.

S2

S2 access control and video management products operate using a web browser and are flexible, expandable elements of a fully-distributed IP network architecture. Technology companies can build an entire ecosystem of S2 access control and video management systems under one centrally-controlled S2 Global network.

BIOMETRIC AUTHENTICATION

Revolutionary biometric identity authentication captures code data at a distance while in motion to provide the most advanced, cost-effective and efficient biometric identity authentication available.

GLOBAL SPECIFICATION & BIM DESIGN CAPABILITY

STANLEY Security supports architects, owners, and engineers with preparation of construction documents in CAD for security systems, for both new construction and retrofit projects and has a full BIM 360, Revit and CAD capability.

AXIS COMMUNICATIONS

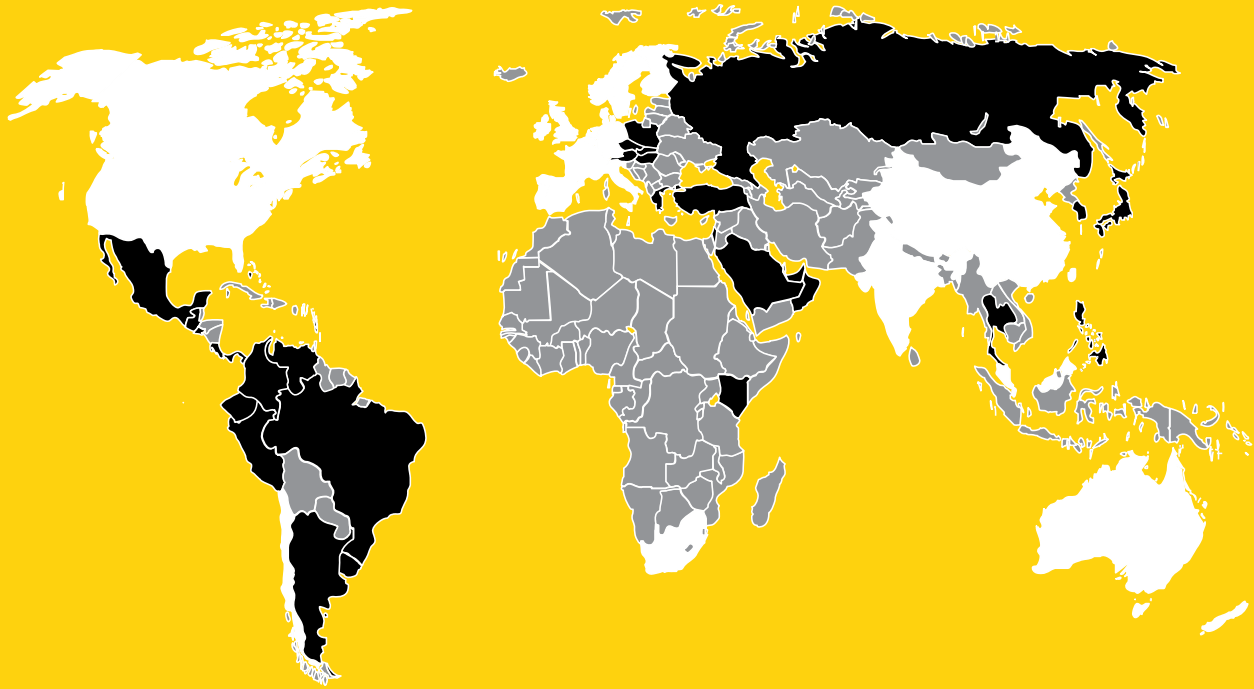

Network video protection for data centers from Axis Communications adds protection at every layer of defense – from perimeter, to grounds, to building, to server hall and cabinets.

TRAKA

Traka systems enable you to secure, manage and audit the use of almost any physical asset, including: premises, devices, secure areas, equipment, machinery and vehicles.

STANLEY®

Security

● STANLEY Security Presence ● Stanley Black & Decker Presence ● Strategic Partner Presence

STANLEY Security offers end-to-end data center security solutions including:

- ▼ Risk assessment, systems design and engineering
- ▼ Project management, security system installation, commissioning and maintenance
- ▼ Access control, perimeter protection, video surveillance and visitor management systems
- ▼ Account-specific requirements including compartmentalized security zones and biometric access control

ABOUT US

STANLEY Security, a division of Stanley Black & Decker (NYSE: SWK), is a provider of integrated security solutions for commercial and industrial organizations globally. We deliver a comprehensive suite of security products, software and integrated systems with a strong emphasis on service.
