Fire Systems & Solutions

STANLEY Security offers a range of fire safety solutions to ensure compliance for your business. For those who make the World™ Safer

Fire Solutions

Protect your staff and property with a FIRE system from STANLEY. Don’t delay – we can assess your fire needs and carefully design the ideal solution.

- Fire Detection & Alarms – Reliable and effective fire detection and alarm systems are essential for all businesses who want to protect their people, their property and their assets.

- Public Address & Voice Alarm – Making announcements or providing public information and automatic alarm/emergency messages.

- Suppression – Future technologies provide the safest possible environments. Includes INERT & SYNTHETIC GAS, WATER MIST, CO2, FM 200 & ARGON.

- Sprinkler & Hydrants – When putting out fires, every second counts. Well-maintained fire extinguishing systems protect human life and material assets.

- Extinguishers – Menu of options for Fire Extinguisher servicing for full control.

- Emergency Lighting – Provides a minimal level of illumination to enable the safe exit of buildings in the event of a power cut. We provide solutions that are compliant with the latest British standards.

Fire Surveys

STANLEY Security also provide a range of fire safety surveys, including fire risk assessments and audits, to organisations throughout the UK.

- Fire Risk Assessment – Process involving the systematic evaluation of the factors that determine the hazard from fire, the likelihood that there will be a fire and the consequences if one were to occur. Includes report with key action points.

- Compartmentation Survey – Inspection of the condition of current compartmentation walls, floors, ceilings and corridors. Includes report with key action points.

- Fire Door Inspection – Fire Door inspections are essential to fully ensure health and safety measures. We provide a fully comprehensive inspection of your Fire Doors including report and key action points.

Fire Training

- Fire Warden Training – The course covers how fires are caused, the risks associated with fire, principles of fire safety management at work, understanding the role of a fire warden, evacuation, precautionary responsibilities and active fire systems user maintenance.
STANLEY Security is the leading global provider of security and life safety systems.

STANLEY Security represents a global network of resources, state-of-the-art technology and a culture dedicated to excellence, where its employees have the expertise, the equipment and the processes they need to deliver the finest integrated security solutions in the industry.

We currently cater for the World’s largest retailers, financial service institutions, education, industry, government, commercial and major transport and logistics companies to local businesses throughout the UK. The Customer First Team set the highest standards of monitoring, service, maintenance and training. Our national call centre is based in the UK and is in constant contact with our engineering team to quickly respond to your needs, anywhere in the UK.
