STANLEY Security

Delivering the future of integrated healthcare security solutions

STANLEY Security provide integrated security and communication systems that bring peace of mind to staff and patients

FOR THOSE WHO
MAKE THE WORLD

SAFER

Healthcare security solutions

Security technologies in Healthcare

STANLEY Security take patient care seriously, with a clear vision of delivering a unified Healthcare security solution that puts staff and patients at its core. Our capability to bring multiple vendors and systems together to drive efficiency and reduce cost means that we are perfectly placed to resolve numerous healthcare business challenges with our critical medical and building management alarms.

Our solutions:

Smart pager systems

Staff protection

Wireless Nurse Call

Access control

CCTV video surveillance and monitoring

System integration

Smart pager systems

Commonly used for emergency teams such as cardiac, trauma, major incident etc.

- Be included in up to 10 groups. No limit to the number of groups per system or the number of users per group

Smart-phone interface for increased user functionality

- Use Wi-Fi enabled smart-phones for instant communication. Uses 3G/4G in areas with no Wi-Fi coverage

Integrate with STANLEY and 3rd party solutions

- Messages from nurse call, access control or fire alarm systems can also be displayed for integrated communications

Call confirmation responses back to switchboard

- Using the CONFIRM button on your smart-phone or pager device provides full visibility that message alerts have been received and responded to, so no need for re-paging

Staff protection with STANLEY Minder

Provide your staff with a simple to use, reliable staff attack solution, pressing the red button instantly alerts colleagues nearby that you require assistance

- Ideal where staff work in isolated areas. The location of the alarm is automatically passed directly to the people working closest to the incident.

The most secure and fastest staff protection system on the market

- Our radio-based solution provides continual polling of all equipment and mobile units to ensure complete system integrity.

Each mobile unit is a standard pager and can be linked to other alarm systems

- Allows for integration of fire alarms, fire exits, door monitors on patients room and drug cupboards

STANLEY Pace Pro units, shown in docking station (left) and yellow cover (right)

Wireless Nurse Call

Helps to prevent trips and falls in all care home and hospital environments

- Wirelessly connects hardwired assistive technology to the Nurse Call System without any hazardous cables or wires.

Built-in Bluetooth and WiFi sensors allow connectivity with a wide range of devices

- Nurse call installations can incorporate chair and bed pads, floor mats, infrared (IR) sensors, and fall monitors plus smart device and pager integration

Monitor resident and staff activity throughout your care home

- Display information in communal areas and access 'real time' reports at the click of a button showing what calls occurred, the response time taken and who responded

Access control systems

Multiple options for managing your access control requirements

- Software or web-based management applications, ideal for small to mid-sized offices and facilities with consistent schedules and staffing

We can provide system installation and remote management via a secure web-based application

- We administer your badging and cardholder database, manage door lock schedules, and provide activity/exception reports as needed. Ideal where staffing and schedules can frequently fluctuate

Solutions designed for small businesses to complex environments and 3rd-party integrations

- Plug and play or integrate access control with intrusion detection, video surveillance, fire detection and time and attendance

State-of-the-art access control systems from leading manufacturers

CCTV video surveillance and monitoring

A crime deterrent as well as a key method to capture and document security events on your premises

- Our CCTV systems use cutting-edge technology to capture high definition images of your premises 24/7

The best way to protect your premises against burglary and break-ins

- STANLEY Security can design, install, maintain and upgrade a wide range of CCTV solutions to meet businesses' specific needs and budgets

Video surveillance and ANPR solutions to suit your needs

- Facial recognition, vehicle recognition, low light surveillance, video cloud platform, perimeter thermo monitoring and motion detection

STANLEY Monitoring centres offer flexible system control and monitoring options

- Professional alert and response services all through our dedicated category 2 NSI Gold Standard BS5979 accredited Alarm Receiving Centre

Integrated security systems

STANLEY Security has an excellent pedigree working with hospitals, nursing homes, residential care and the mental health sector and uses trusted technology partners to provide fully integrated systems that harness the latest and most advanced technology.

We offer a wide range of state-of-the-art systems from leading manufacturers that are ideal for use in these environments, such as: STANLEY, Axis Communications, BlueSky, Cortech Developments, Genetec, Milestone and Vingtor Stentofon.
