# INTEGRATED SECURITY SYSTEMS

Protect your people and solve your toughest security challenges with Integrated Security Systems. We can help you bring everything together into one easy-to-manage platform, whether you're responsible for one building, multiple buildings, or multiple sites.

# INTEGRATED SECURITY

## UNIFY SECURITY MANAGEMENT

STANLEY Security specialises in providing fully flexible and functional solutions for controlling all your security in one simple platform. We know you want to protect your people and safeguard your assets, but we also know how stressful and time-consuming managing multiple security systems can be. With Integrated Security Systems, complex challenges can be more easily managed.

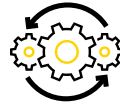

## WHAT IS AN INTEGRATED SECURITY SYSTEM?

Integrated Security Systems work by bringing together all of your existing security functions (e.g., Intruder Alarms, Access Control, Fire Protection, Visitor Management, or CCTV) into one easily manageable ecosystem. This means you can centralise the management of disparate security and access control systems.

### COST EFFECTIVE

A COST-EFFECTIVE SOLUTION TO OPTIMISE THE OUTPUT OF YOUR SECURITY SYSTEMS

### EFFICIENT

MORE EFFICIENT MANAGEMENT OF ALL YOUR SECURITY FUNCTIONS WITH LESS HEAVY LIFTING

### DATA INSIGHTS

DEEPER DATA-INSIGHTS TO HELP YOU MAKE BETTER DECISIONS

### RELIABILITY

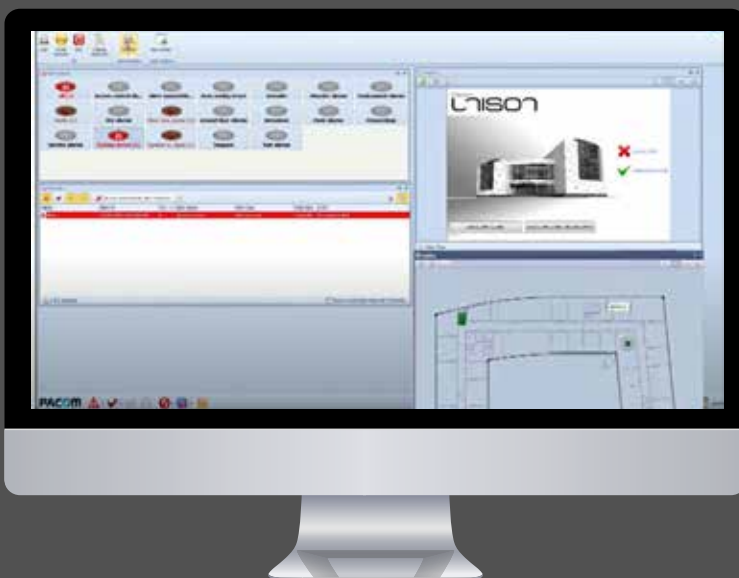

EXTENDED LONGEVITY AND RELIABILITY OF YOUR SECURITY SYSTEMS

### READY TO UPGRADE?

A FRICTIONLESS APPROACH TO UPGRADE OR SCALE YOUR SECURITY IN THE FUTURE

# SECURITY MANAGEMENT MADE EASY

## INTUITIVE USER INTERFACE

We use cutting edge software from leading technology suppliers - such as **PACOM Unison** and **Genetec**.

The interface navigation is userfriendly, and operators can quickly and efficiently respond to events - including real-time interactive icons indicating device location and status.

The “workspaces” enable administrators to define what user interface should appear for a specific role or user - which toolbars, menus, and palettes appear, and where. Users can define their own experience and choose the exact look and feel they prefer.

# INTEGRATED SECURITY SYSTEMS

## IS INTEGRATING SECURITY RIGHT FOR YOUR BUSINESS?

Integrated Security Systems can be utilised by any business that has multiple security systems to manage. We work with companies of all sizes, with one or multiple sites to protect, providing the best solutions to serve their unique needs.

## IF YOU ARE FEELING ANY OF THESE PAIN POINTS YOU SHOULD DEFINITELY CONSIDER INTEGRATING YOUR SECURITY:

“I am uncomfortable with the time and effort it takes to manage security systems.”

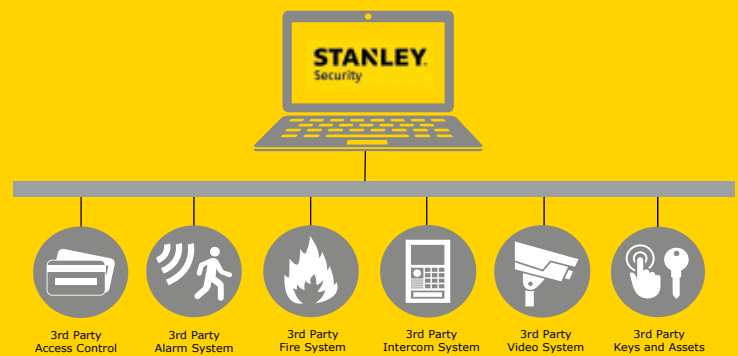

“We sometimes struggle to keep up with the maintenance of all our systems, and there are some that don’t even work properly.”

“Our current systems might not be providing tangible benefits to my business for the money we are spending.”

“I need to add new systems but need them to integrate fast and easily in the future.”

## HOW DOES SECURITY SYSTEM INTEGRATION WORK?

We can help you connect any of the following security systems and manage them all in one place.

## THERE ARE TWO WAYS YOU CAN ACHIEVE A FULLY INTEGRATED SECURITY SYSTEM.

1. You can adapt an existing system to serve as a data collection hub for all the security system feeds.
2. Use a new, all embracing system to collect data from existing subsystems.

The latter provides the most effective, professional solution. At STANLEY Security, we can talk you through both options.

## WHAT OUR CUSTOMERS SAY

“Great work by you and the team. From a business perspective there was minimal disruption and migration has finished way ahead of timescale (and budget). Well done and thank you!”

- Stansted Airport

## TAKE ACTION

Are you ready to integrate your security systems into one ecosystem that's easy to manage, maintain and upgrade? Speak to one of our experts today.
