Security

Smarter home security

Protect what you value most

STANLEY Security gives you more

A STANLEY Security powered system provides solutions to monitor, protect and automate your home. More than a smart app or a cool device, STANLEY Security seamlessly connects the key systems in your home on one platform so they work more intelligently together.

With STANLEY Security you can:

- Protect what matters most
- Take control of your energy use
- Ensure safety and peace of mind
- Instantly see what you care about

Bringing security home

Our range of smart home security solutions deliver a host of features and benefits, including:

- Personalised scenes
- Patented crash and smash protection
- Exclusive image sensor*
- Location-based geo-services
- Severe weather alerts
- Customised triggers and alerts

Smart home security

Keep your home and loved ones protected with professionally monitored smart home security and always be connected to what's happening at home.

→ **Dedicated connection**

Dedicated and secure cellular communication provides safe and reliable uninterrupted protection.

→ **Patented crash and smash protection**

Your system will continue to work even if the security panel is damaged or the phone line is cut.

→ **Instant alerts**

Get real-time notifications by push notification and email the moment something happens in your home.

→ **Personalised user codes**

Create unique user codes to know who's coming and going at all times.

Live monitoring

→ **Stream video live**

Watch live feeds from your property on your phone, tablet or computer.

→ **Get instant video alerts**

Get video clips sent directly to you when the front door opens, the alarm goes off, or if motion is detected.

→ **Never miss a thing**

Motion or event triggered video clips make it easy to find exactly what you want to watch later.

→ **Get continuous recording**

Enjoy 24/7 HD recording through the Stream Video Recorder (SVR). The SVR provides secure, cloud-based streaming and video clip access from anywhere.

Home automation

Upgrade your smart home with easy control and intelligent automation across all of your connected devices.

→ Be fully connected

STANLEY Security assembles the information from all of your connected devices and enables them to work together seamlessly.

→ Get location-based geo-services

Geo-services gives you added automation that responds based on your location. Have your thermostat automatically adjust when you leave for work or get a reminder if you forgot to arm the security system.

→ Easily access everything

Control and manage your home no matter where you are with an array of apps from varying devices. Not just for your smartphones or tablets you can also use Apple TV, Apple Watch, Amazon Fire TV and Amazon Echo to stay in the know.

Remote access

Enhance your security with complete control and visibility over all the entry points to your home.

→ Automate your locks

Seamlessly integrate door locks with the STANLEY Security intelligent platform to get real-time visibility and control.

- Automatically lock the door when your system is armed
- Get a push notification or email alert when the door is unlocked
- Assign unique user codes for temporary access

→ Control garage doors remotely

Manage your garage doors automatically or on-demand directly from your desktop or mobile device.

- Check to see if your garage door is closed no matter where you are
- Close the garage door automatically when your system is armed
- Receive an alert if you left the door open

Energy management

→ Control climate and ambiance remotely

Control your thermostats and lights, no matter where you are. With customisable, flexible schedules you always come home to a comfortable environment.

→ Turn on to intelligent lighting

Remotely turn your lights on or off, have them come on automatically when you walk in the door, or set a schedule to make it look like someone is home when you're on vacation.

→ Gain measurable results

Get real insight into your energy use and see where you're consuming the most energy. Use measurable data to make changes that have real impact.

Climate control

The intelligently integrated thermostat allows you to take control of your energy use and automate temperature settings.

→ Make responsive savings

Tapping into data from inside and outside the home, your thermostat automatically responds to activity, occupancy and weather patterns.

→ Be intelligently connected

Your thermostat seamlessly integrates with devices across the smart home. Everything responds together to your daily routines for ease of use and a unified experience.

→ Get complete control

Adjust or change your thermostat settings anytime from anywhere and instantly know if someone else makes a change.

Image sensor*

STANLEY Security wireless image sensor is an advanced motion sensor with an onboard camera that takes a picture when motion is detected and sends it to you.

→ Instant visual verification

Whether it's day or night, you'll be able to see what's going on immediately.

- Customised notifications
- On-demand views
- High quality images
- Pet immune motion detector
- Easy installation

Now you can have at-a-glance visibility into what's happening at home, wherever you are.

STANLEY®

Security

Endorsed by experts

The New York Times

"I found the system powerful and easy to use. I especially liked the way the system's components work together."

*Reviews relate to the technical platform.

WIRED

"One of the coolest integrations we saw [at the Apple Watch keynote event] was all the stuff you can control through the app using the watch. Security cameras, lights, locks, doors. Just a few taps and you can keep tabs... from anywhere."

CNN

"An innovative app to control everything from locks and lights to security systems and thermostats."
