

STANLEY PAGING BY ROYAL APPOINTMENT

East Kent Hospitals University 
NHS Foundation Trust

BACKGROUND

Queen Elizabeth the Queen Mother Hospital is one of the three main hospitals in the East Kent Hospitals Trust area.

The hospital provides the full range of emergency and elective services and is also a centre of excellence in pain management, hosting an award-winning team at the pain clinic.

CASE STUDY

THE REQUIREMENT

The hospital was looking to improve its paging system, which was provided by one of STANLEY's main competitors. The system is used to contact key medical staff.

THE SOLUTION

STANLEY won the contract to supply the Queen Mother Hospital with an Aquarius paging system incorporating 125 alphanumeric/ one-way speech pagers – this was an improvement on the previous system because it gave a more comprehensive coverage of the site and the pagers are smaller and lighter.

The Aquarius solution provides the added benefit of working alongside the Digital Cordless Telephone System, which is also operational within the hospital.

The Queen Mother Hospital acquired the solution via STANLEY Finance, which simplifies budgeting as payments are spread over the lifetime of the agreement, and also includes maintenance and service.

Aquarius Paging System
