Comprehensive Web-Based Time Recorder

ITR-10 Web-Based Time & Attendance

Stanley's iTR-10 web-based time and attendance system is ideally suited for the needs of the Small to Medium Sized Enterprise (SME) Market. With the ability to provide real-time information at the touch of a button wherever you have secure VPN (Virtual Private Network) access to the internet, iTR-10 provides businesses with added flexibility for managing their staff's time and attendance.

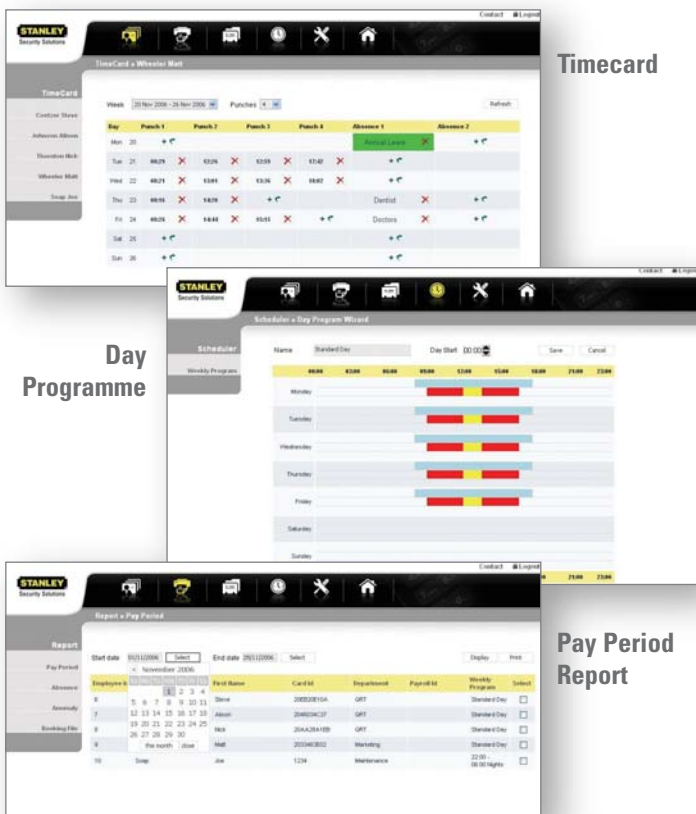

iTR-10 is designed to run on Microsoft Internet Explorer and doesn't require any expensive computer equipment or complicated software installation as all application software and programme configuration is stored on flash memory within the terminal, making it easy to calculate, track, analyse and report on individual employee data including hours worked, absenteeism, holidays, breaks, overtime and more.

Features

- Maximum capacity of 50 employees
- Plug and Play technology
- Full curriculum definition
- Definition of absence reasons
- On-board web server within terminal
- Contains 10 daily, 5 weekly programmes
- Records day start, core times, multiple breaks (paid unpaid)
- Extensive reporting, including:
 - Date specific pay period report, showing the following information
 - * 1st and last booking
 - * Target hours required
 - * Balance
 - * Breaks
 - * Overtime
 - Absentee Report
 - Anomaly Report
- Export all reports to Excel

System Requirements

- The Booking terminal will require an IP address this can be either static or DHCP enabled
- PC that has access to the internet running Microsoft Internet Explorer 6 or above.
